

DE-A-26 25 749

A multipurpose hand-operated utensil, comprising a stapler 41/42, a punch 5/14, and a de-stapler 44/341. The stapler may be switched off by displacing its driver from an activated position into an inactivated position. Fig. 1 and 2 illustrate a first embodiment, Fig. 3 and 4 illustrate a second embodiment.

DE-U-1 768 157

A pocket knife including blades, nail files, scissors and the like plus a stamp and ink pad. All four Fig. relate to one single embodiment.

DE-A-41 10 688

A stapler having an integrated de-stapler, the latter being designed not to cause damage at the de-stapled sheets. There is no description of the embodiments. It is simply stated that the de-stapler may be mounted on top or lateral with respect to the stapler lever.
